

## CẤU TRÚC THƯ MỤC FASTAPI GỢI Ý

| Đường dẫn                            | Ý nghĩa                                           |  |  |
|--------------------------------------|---------------------------------------------------|--|--|
| <code>project_fastapi/</code>        | Thư mục gốc dự án                                 |  |  |
| <code>app/</code>                    | Mã nguồn chính                                    |  |  |
| <code>app/main.py</code>             | Khởi tạo FastAPI app, include routers, middleware |  |  |
| <code>app/core/</code>               | Cấu hình dùng chung                               |  |  |
| <code>app/core/config.py</code>      | Đọc biến môi trường và settings                   |  |  |
| <code>app/core/security.py</code>    | Hash password, JWT encode/decode                  |  |  |
| <code>app/db/</code>                 | Kết nối và session database                       |  |  |
| <code>app/db/database.py</code>      | engine, SessionLocal, Base, get_db                |  |  |
| <code>app/models/</code>             | SQLAlchemy models                                 |  |  |
| <code>app/models/user.py</code>      | Model User                                        |  |  |
| <code>app/models/project.py</code>   | Model Project / ProjectMember                     |  |  |
| <code>app/models/task.py</code>      | Model Task                                        |  |  |
| <code>app/schemas/</code>            | Pydantic request/response schemas                 |  |  |
| <code>app/routers/</code>            | FastAPI APIRouter theo module                     |  |  |
| <code>app/routers/auth.py</code>     | Register/Login                                    |  |  |
| <code>app/routers/users.py</code>    | User endpoints                                    |  |  |
| <code>app/routers/projects.py</code> | Project/Member endpoints                          |  |  |
| <code>app/routers/tasks.py</code>    | Task endpoints                                    |  |  |
| <code>app/services/</code>           | Nghiệp vụ và thao tác dữ liệu                     |  |  |
| <code>app/dependencies/</code>       | get_current_user, role/permission dependencies    |  |  |
| <code>app/utils/</code>              | Helper dùng chung                                 |  |  |
| <code>tests/</code>                  | Test API/service                                  |  |  |
| <code>.env.example</code>            | Mẫu biến môi trường, không chứa secret thật       |  |  |
| <code>requirements.txt</code>        | Danh sách thư viện                                |  |  |
| <code>README.md</code>               | Cách cài đặt, chạy và demo                        |  |  |
|                                      |                                                   |  |  |
|                                      |                                                   |  |  |
|                                      |                                                   |  |  |
|                                      |                                                   |  |  |
